

Donastar 36-Series Filter

For Sediment

The Donastar 36-series filter is ideal for reducing sediment or particulate such as rust, sand, and dirt in your water. Each filter cartridge is constructed of meltblown polypropylene fibers that offer effective filtration performance.

- Built without any additives; the 36-series filter will not discolor or create foam in your drinking water
- Features a 5 micron (nominal) pore size
- Available in multiple keys to fit either our proprietary manifold or Everpure and 3M/Cuno manifolds
